Re: Air Quality  
Minor (Synthetic)  
Permit to Construct

Dear Ms. Pundari:

The North Dakota Department of Environmental Quality (Department) issued Air Permit to Construct ACP-18145 v1.1 on September 9, 2022 for the 4Runner Compressor Station located in Williams County, North Dakota. The facility was inspected by Department personnel on July 24, 2023. Before issuing an Air Permit to Operate, the Department has determined that a revised Air Permit to Construct is required.

Enclosed is a copy of the Department's draft/proposed minor (synthetic) Air Permit to Construct for the facility. Before making final determinations on the permit application, the Department provides for public comment by means of the enclosed public notice and provides for a concurrent 30-day Environmental Protection Agency (EPA) review. As indicated in the notice, the public comment period will begin on February 23, 2024 and end on March 24, 2024.

All comments received will be considered in the final determination concerning issuance of the permit. The Department will take final action on the permit application following the public comment period and EPA review. You will be notified in writing of our final determination.

If you have any questions, please contact me at (701)328-4639 or email [rsmartin@nd.gov](mailto:rsmartin@nd.gov).

Sincerely,

Russell Martin  
Environmental Scientist  
Division of Air Quality
