## North Dakota Petroleum Tank Release Compensation Fund

### Tank Classification Tables

**Instructions:** Please check the appropriate check boxes that are applicable to the tank type(s) on location. Please provide the tank number in the adjacent box.

#### Table 1

These risk classifications apply to underground storage tank(s) only

<b>Underground Storage Tank type at Registered Tank Location</b>	Check Box	Number of tanks	Above 10% ethanol blend
1 = Double wall piping & tank(s) – Underground 2009 and newer installation			Yes/No
2 = Double wall piping & tank(s) – Underground 2008 and older installation			Yes/No
3 = Single wall underground tank(s) with double wall piping			Yes/No
4 = Double wall underground tank(s) with single wall piping			Yes/No
5 = Single wall underground tank(s) with single wall piping			Yes/No

#### Table 2

These risk classifications apply to aboveground storage tank(s) only

<b>Aboveground Storage Tank type at Registered Tank Location</b>	Check Box	Number of tanks	Above 10% ethanol blend
1 = Aboveground tank(s) feeding aboveground piping			Yes/No
2 = Aboveground tank(s) feeding underground piping with *leak detection			Yes/No
3 = Aboveground tank(s) feeding underground piping without *leak detection			Yes/No

*\*Note: Definition 4 in NDAC 33.1-12-01-01. Definitions – “Leak detection” means a detection system that performs line leak testing for underground piping connected to aboveground storage tanks.*
