Attachment A - Summary of Loans Awarded

Attachment B - Summary of Payments

Attachment C - Capitalization Grant Requirements Status Summary and Details

I. INTRODUCTION

The State of North Dakota hereby submits its 2023 Clean Water State Revolving Fund (CWSRF) Annual Report. The Annual Report is prepared in adherence with the Operating Agreement, negotiated between the state and the U.S. Environmental Protection Agency (EPA), governing the administration of the CWSRF. The Annual Report is intended to summarize the activities of the CWSRF over a one-year period beginning January 1, 2023. Information concerning the use of CWSRF funds, accomplishments of the program, and adherence to the stated goals of the program will be provided.

II. EXECUTIVE SUMMARY

The Clean Water State Revolving Fund (CWSRF) Program was established by Title VI of the Federal Water Pollution Control Act (FWPCA), a.k.a. the Clean Water Act (CWA), as amended in 1987. The CWSRF Program is a financial assistance program for water pollution control projects. Under the CWA, the U.S. Environmental Protection Agency (EPA) awards annual capitalization grants to each state to capitalize a state revolving fund, which the state can then use to provide financing for statewide eligible projects. The state CWSRF was established under North Dakota Century Code (NDCC) Section 61-28.2 and is administered in the state by the North Dakota Department of Environmental Quality (NDDEQ), following North Dakota Administrative Code (NDAC) Section 33.1-35. Assistance is provided by the North Dakota Public Finance Authority (PFA) through a formal agreement to manage the financial portion of the program.

During the reporting period, 11 project loans (plus three loan increases) were made to provide financial assistance for eligible program activities. The total amount of project loans was \$122.9 million. The summary of loans awarded is in Attachment A of this report. Disbursements from the CWSRF base program to the recipients, PAR reimbursements, and program administration totaled \$66.3 million during the reporting period. The summary of payments is in Attachment B of this report.

Section 302 of the Safe Drinking Water Act Amendments of 1996 provides that, at the governor's discretion, a state may transfer up to an amount equal to 33 percent of the Drinking Water State Revolving Fund (DWSRF) capitalization grants to the CWSRF Program, or an equal amount from the CWSRF to the

DWSRF. In addition to transferring grant funds, states can transfer state match, investment earnings, principal and interest repayments, unrestricted cumulative excess, restricted cumulative excess, or Federally Capitalized Loan Account (FCLA) funds between SRF Programs. A combined total of \$54.6 million has been transferred from the CWSRF to the DWSRF, and \$31.1 million was transferred back from the DWSRF to the CWSRF. The net transfer between programs is \$23.5 million from the CWSRF to the DWSRF.

The main sources of CWSRF funds are net principal repayments and interest payments that the program has received from prior SRF loans, which are considered non-federal funds.

The interest rate for CWSRF loans originating in 2023 is 1.5 percent for a maximum term of 30 years. In addition, there is an administrative fee of 0.5 percent paid in conjunction with loan repayments. The administrative fee is deposited in the SRF Administration Fund and will be used to augment the administration set-aside and other eligible activities as needed and to assure that the CWSRF will have sufficient funds to administer the program in perpetuity, as required by law. The balance in the State Administration Fund was approximately \$6.4 million at the end of 2023.

III. GOALS AND OBJECTIVES

The Intended Use Plan (IUP) prepared for the CWSRF identifies the state's long- and short-term goals and objectives in managing the program. The state has achieved progress towards meeting these goals and objectives.

The long-term goal of the CWSRF is to maintain or restore and enhance the chemical, physical, and biological integrity of the state's waters for the benefit of the overall environment, the protection of public health, and the promotion of economic well-being. The short-term goal is to continue improving the quality of the state's waters, meet the wastewater treatment needs of the state, and eliminate any public health hazards related to the discharge of inadequately treated wastewater.

A. Long-term Objectives

1. Maintain a permanent, self-sustaining CWSRF Program that will serve in perpetuity as a financing source for wastewater treatment and

water pollution control activities, including nonpoint and groundwater projects.

2. Fulfill the requirements of applicable federal, state, and local laws and regulations pertaining to water pollution control activities, while providing the state and local project sponsors with maximum flexibility and decision-making authority regarding such activities.
3. Encourage a range of practices that support sustainable wastewater infrastructure and overall system sustainability.

The *SRF Internal Operations Manual* was developed to ensure that all state and federal laws governing the technical aspects of the project are satisfied. The PFA ensures that laws regarding the financial aspects of the program are satisfied.

B. Short-term Objectives

1. Continue to administer the current CWSRF Program, providing low-interest financing for municipal wastewater facilities (CWA Section 212) and eligible nonpoint source (CWA Section 319) projects.

The program is established, and the state match has been provided. At 1.5 percent plus 0.5 percent administration fee, the effective 2.0 percent interest rate is below market rates.

2. Ensure the technical integrity of CWSRF projects through the review of planning, design, and construction activities.

The trained staff of the NDDEQ is utilizing the *SRF Internal Operations Manual* and knowledge gained through the Construction Grants Program to ensure that this objective is met.

3. Ensure compliance with all pertinent federal, state, and local water pollution control laws and regulations.

The trained staff of the NDDEQ is utilizing the *SRF Internal Operations Manual*, and knowledge gained through the Construction Grants Program to ensure that this objective is met.

4. To the extent possible, obtain maximum capitalization of the fund for the state.

To meet this objective, the NDDEQ has aggressively addressed expanded uses of CWSRF funds. Bonds were issued in 2018 but not issued in 2019 - 2021. In January 2022, \$25 million of leveraged bonds were issued to help meet the program’s cash needs. On March 26, 2024, the Industrial Commission approved a resolution that allows the PFA to issue up to \$225 million of CW leveraged bonds as well as refund SRF 2015A outstanding bonds that would provide savings to the SRF programs.

5. Apply for available appropriated federal funds contingent upon federal legislation.

The summary of the 2023 Grant activity is in the table below.

| Program | Year | Allotment | Amount | Date Awarded | Notes |
|---------|------|------------------|--------------|--------------|-----------------------------------|
| CWSRF | 2022 | BIL EC | \$459,000 | 7/31/2023 | Eligible project loan is approved |
| CWSRF | 2023 | Base | \$3,683,000 | 7/25/2023 | All funds expended 8/23/23 |
| CWSRF | 2023 | BIL Supplemental | \$10,233,000 | 8/1/2023 | All funds expended 10/30/23 |
| CWSRF | 2023 | BIL EC | \$1,043,000 | 7/31/2023 | Eligible project loan is approved |

6. Continue to complete an EPA environmental benefits spreadsheet for each project.

The trained staff of the NDDEQ ensure that this objective is met.

7. All required reporting information will be entered into the Office of Water State Revolving Funds data system.

The trained staff of the NDDEQ ensure that this objective is met.

IV. ACCOMPLISHMENTS

The North Dakota CWSRF provided 11 project loans (plus three loan increases) to fund projects during the reporting period totaling \$122.9 million. Of these projects, 76% went to communities that have affordability criteria points and are considered disadvantaged communities. These projects will be funded by capitalization grants and the FCLA. Of the projects

under binding commitment, six included wastewater treatment, two included sewer rehabilitation/ replacement, three included storm water control and drainage improvements, one included new collector sewers, one included new interceptor sewer systems, and three included recycled water distribution. Disbursements from the CWSRF base to loan recipients totaled \$65 million and disbursements for PAR totaled \$0.4 million during the reporting period. The Summary of Loans Awarded and the Summary of Payments are in Attachments A and B of this report.

The CWSRF program finalized data entry for the 2022 Clean Watersheds Needs Survey (CWNS) in 2023. This involved working with other programs and agencies to develop state-specific approaches for NPS Control categories and utilize the CWSRF IUP process to capture wastewater, stormwater, and landfill needs.

SRF Tracker, a new cloud-based programmatic data management system for consulting engineers, SRF loan recipients, owners, and staff, was launched in 2023 after years of efforts by the SRF programs to assist in developing this system.

During 2023, the NDDEQ and PFA updated the external SRF Program Project Manual, available on our website, and continued to work on updating the Internal Operations Manual. The SRF staff developed and presented SRF Reinvented in person at three different locations in the state. The presentation was also recorded and is available on our website.

The SRF Programs continued outreach and marketing through presentations at the ND Rural Water Systems Annual Conference, ND League of Cities, and ND Water Pollution Control Conference, as well as hosting one-on-one meetings with cities during pre-project meetings. We also hosted booths at the ND League of Cities Annual Convention and the annual ND Water Pollution Control Conference.

The SRF also accessed the state's GovDelivery subscription and received training on how to use the application. This application has allowed the SRF to distribute timely emails on important topics and training sessions, as well as implement a periodic SRF Newsletter. It also makes maintaining an SRF email distribution list much easier.

The NDDEQ streamlined project requirements based on project categories. These efforts began with the CWSRF program defining treatment works. The project categories are listed below.

- All CWSRF/DWSRF Projects
- CWSRF Treatment Works and all DWSRF Projects
- SRF Equivalency Projects
- BIL Equivalency and/or BIL Loan Forgiveness Project

Prior to these changes, all SRF projects had to meet all federal requirements, even if they did not need to. Now, each project only has the essential requirements that substantially help our loan recipients.

V. GRANT CONDITIONS AND CERTIFICATIONS

The State of North Dakota agreed to a number of conditions in the Operating Agreement and Capitalization Grant. The following conditions have been met and need no further description.

- Agreement to Accept Payments
- State Laws and Procedures
- State Accounting and Auditing Procedures
- Use of the Letter of Credit (LOC)
- Repayments
- Annual Audit
- Annual Report
- Annual Review

The following narrative discusses additional requirements and how the state addresses them. Relevant sections of the Clean Water Act are provided in parenthesis beside the requirement title where applicable.

A. Provide State Match

In 2023, \$1 million of non-program income was transferred from the state administrative account to the state match account to provide future state match funds.

The NDDEQ has deposited into the CWSRF from state monies an amount equal to 20% of the capitalization grant on or before the date on which

the state received each grant payment from EPA. The required state match has been provided through FY 2031 and beyond.

For the BIL supplemental match requirement, the NDDEQ has deposited into CWSRF state monies in an amount equal to 10% for FY 2022 and FY 2023 and 20% based on the estimated amount of the grants for FY 2024 through FY 2026.

B. Environmental Reviews (Section 602(b)(6) and 511(c)(1))

The state certifies that it has conducted environmental reviews of each treatment works (Section 212) project receiving assistance from the CWSRF. North Dakota will either follow National Environmental Protection Agency procedures or equivalent state procedures in conjunction with such environmental reviews.

C. Binding Commitments Within One Year (Section 602(b)(3))

The state agreed to enter into binding commitments to provide assistance from the CWSRF in amounts equal to at least 120 percent of each quarterly capitalization grant payment within one year of receiving each payment. The state met this requirement by the end of the one-year period.

D. Expeditious and Timely Expenditures (Section 602(b)(4))

The state disbursed all cash draws and other available CWSRF funds in a timely manner. The Summary of Payments in Attachment B details the project payments made during the reporting period.

E. First Use of Funds for Enforceable Requirements (Section 602(b)(5))

North Dakota does not have any projects on the National Municipal Policy list; therefore, the "first use" requirement does not apply.

F. Eligible Activities

Section 212 and Section 319 projects were funded during the reporting period.

G. MBE/WBE Requirements

Loan recipients are required to comply with all Disadvantaged Business Enterprise (DBE) utilization requirements. The fair share objective for North Dakota during the reporting period was 2 percent Minority Business Enterprise (MBE) and 3 percent Women's Business Enterprise (WBE) participation. The actual participation achieved was 0 percent for MBE and 1.4 percent for WBE. The NDDEQ will continue in its efforts to promote and obtain additional DBE participation in the CWSRF Program.

H. Green Project Reserve

The State agreed to enter into binding commitments to assist with projects meeting the requirements of the Green Project Reserve (GPR) in an amount equal to at least 10 percent of the FY 2023 base capitalization grant, FY 2023 BIL Supplemental grant, and FY 2022 and 2023 BIL Emerging Contaminant grants.

The state has met the GPR requirements for all base and BIL Supplemental capitalization grants through FY 2023. The BIL Emerging Contaminant grant projects did not meet the GPR requirements for FY 2022 or FY 2023. In the future, the state will continue to seek GPR-eligible projects by prominently soliciting all four categories of GPR projects and working with those projects on the project priority list to proceed with SRF funding.

The lists of GPR-related project loans, as well as the corresponding summary of GPR requirements are in the Capitalization Grant Requirements Status Table in Attachment C.

I. Additional Subsidization

The CWSRF Program provides additional subsidization as loan forgiveness, which is allocated based on the priority ranking system. The priority ranking system is in Attachment D and is comprised of five categories: Affordability, Water Quality Improvements, Permit Compliance, Readiness to Proceed, and Green Project Reserve.

A summary of additional subsidization requirements and a listing of project loans is included in Attachment C.

J. Davis-Bacon Prevailing Wage Requirements (Section 602(b)(6) and Section 513)

Loan recipients are required to comply with all Davis-Bacon Prevailing Wage Requirements for treatment works projects. Recipients agree to this in their loan agreements with the state.

K. American Iron and Steel Requirements (Section 608)

Loan recipients who were required to comply with the American Iron and Steel Requirements did so. Recipients agree to this in their loan agreements with the state.

L. Build America, Buy America Act

BIL creates the Build America, Buy America (BABA) Act domestic sourcing requirements for federal financial assistance programs for infrastructure including SRF programs. BABA will apply to the identified Equivalency Project(s). When BABA applies, recipients agree to this in their loan agreements with the state.

M. Compliance with Title II Requirements

The State of North Dakota certifies that it will ensure that sufficient financial assistance is provided from the fund to treatment works projects with eligible construction costs. This satisfies the Title II equivalency requirements in an amount equal to the funds directly made available by the federal capitalization grant if required by federal law.

N. Generally Accepted Accounting Principles (GAAP) (Section 602(b)(9))

As a condition of the loan agreement, loan recipients, are required to keep records for the project separate from other records and maintain them according to Generally Accepted Accounting Principles (GAAP) as issued by the Governmental Accounting Standards Board.

O. Cost and Effectiveness Analysis (Section 602(b)(13))

The state requires assistance recipients and their consulting engineers to certify that they have studied and evaluated the project's cost-effectiveness and water/energy efficiency.

P. Architect/Engineer (A/E) Procurement (Section 602(b)(14))

Equivalency loans are required to meet the elements of the procurement processes for A/E services. Equivalency loans are identified in the Capitalization Grant Requirements Status Table in Attachment C.

Q. Fiscal Sustainability Planning (Section 603(d)(1)(E))

A recipient of a loan for a project that involves the repair, replacement, or expansion of a publicly owned treatment works is required to develop and implement a fiscal sustainability plan (FSP) or certify that it has developed and implemented such a plan. This is not required of the state at this time.

R. Signage

The state requires assistance recipients to comply with SRF Signage Guidance. Generally, this requirement is met by issuing press releases. A physical sign is needed to meet BIL signage requirements for BIL equivalency and BIL loan forgiveness projects. The SRF has purchased signage and it is available to be picked up or delivered to the BIL project sites.

S. Single Audit Act (2 CFR Part 200, Subpart E.)

Equivalency loans are required to meet the Single Audit Requirements. Equivalency loans are identified in the Capitalization Grant Requirements Status Table in Attachment C.

T. Other Federal Authorities and Equivalency Projects

The NDDEQ certifies that it will comply with and require all recipients of funds "made directly available" by capitalization grants to comply with applicable federal authorities. Equivalency projects are defined within the SRF programs as a select group of loans whose sum is equal to the amount of the capitalization grant which are required to meet certain

federal requirements. They must meet the federal crosscutter, single audit, and FFATA reporting requirements. Build America Buy America (BABA) has also been added. States are required to meet equivalency under both the base CWSRF and the BIL. The NDDEQ intends to utilize project loan(s) equal to the base CWSRF and BIL capitalization grants to meet the equivalency requirements in accordance with federal law.

U. Reporting Requirements

The state agreed to enter data quarterly into the SRF Data System as specified by the EPA and will endeavor to meet the reporting requirements outlined in the grant conditions.

VI. PROGRAM CHANGES

Any minor changes in procedures recommended in the Annual Review will be incorporated into the program.

VII. PROPOSED IMPROVEMENTS

We expect to continue improving the operation of the CWSRF Program in the areas of transparency and accessibility with SRF Tracker, DBE utilization and full compliance with federal requirements.

Clean Water State Revolving Fund Program
Summary of Loans Awarded
(January 1 - December 31, 2023)

| <i>Recipient (1. Indicates Affordability Criteria met)</i> | <i>Project Number</i> | <i>Binding Commitment</i> | <i>Loan Amount</i> | <i>Project Description</i> | <i>Cost Category</i> |
|--|-----------------------|---------------------------|--------------------|--|----------------------|
| Grand Forks ¹ | 380806-06 | 02/02/23 | \$3,167,000 | Highway 81 and Assoc. Area Storm Sewer and Pond | VI |
| Center ¹ | 380915-02 | 02/23/23 | \$500,000 | LS, FM, Lagoon Impr. | I |
